

TS-53 October 1964

**General Schedule
Position Classification Flysheet**

WCPS-2 August 2002

**HORTICULTURE SERIES,
GS-0437**

**Workforce Compensation
and Performance Service**

GS-0437

The standard for this series, published in August 1947 under the code of P-456-0, is hereby rescinded. This action has been taken because of extensive technological changes in the occupational area, as well as organizational changes in the work itself.

The [Research Grade Evaluation Guide](#) as revised in June 1964, should be used to evaluate research positions in this series in most work situations. Nonresearch positions should be classified by cross reference to approved standards for an appropriate series, such as those for the [Agronomy Series](#), published in February 1961.

Two class title, *Horticulturist and Research Horticulturist*, the former applying to nonresearch positions and the latter to research positions, are appropriate for the two broad functional specializations in this series. These titles are authorized for use until a new classification standard is officially approved and published for this series.
